Teneros CEO To Speak at

Information Lifecycle Management Summit 2006

Steve Lewis Will Discuss Email and Business Continuity for Microsoft Exchange

MOUNTAIN VIEW, Calif. — February 2, 2006—Teneros today announced that founder and CEO Steve Lewis has been selected to speak at the upcoming Information Lifecycle Management Summit. He will address the topic of how to assure email and business continuity for Microsoft Exchange.

The summit, which will take place February 13-15, 2006 in Irvine, Calif., is designed to provide practical information on ILM-related issues. Key topics include compliance and regulatory issues, records management, data and storage security, data protection, e-mail and IM management, backup and recovery, enterprise content management, data warehousing, wide-area services and networking, policy-based management and best practices.

Lewis will participate in a panel called *Making ILM Work (Cost-Effectively) in the Enterprise.* Other panelists include company representatives from Onaro, Abrevity, Sepaton, Archivas and EMC. Lewis' panel will take place at the Hilton Irvine on Tuesday, February 14 at 7:00 p.m.

"Email has become the leading communication medium for sharing information across all functions of the enterprise, which means that downtime of any kind is simply unacceptable in today's business world," said Steve Lewis, founder and CEO of Teneros. "Mid-market companies have scarce or shared IT resources and many branch offices of large enterprises have no dedicated IT resources, yet the demand for 24x7 email continuity remains. At Teneros, we make always-on email for Exchange users a cost-effective reality for mid-markets and remote offices of large enterprises."

Last September at DEMOfall, Teneros launched the Teneros Application Continuity Appliance™ (ACA) for Microsoft® Exchange, the first appliance on the market to deliver instant-on™ failover in the event of planned or unplanned downtime for Microsoft Exchange servers. With a 20-minute,

plug-&-go™ installation, instant-on™ failover, data corruption prevention, and no intrusive agents on the Exchange server, the Teneros appliance ensures continuous, 24X7 Exchange operation for end users. Teneros' solution can be deployed equally effectively at headquarters or at branch offices of large organizations to provide 99.99%-99.999% (four nines to five nines) uptime for Microsoft Exchange.

ABOUT TENEROS
Founded in 2003, Teneros has pioneered a new product category that assures continuity of operations for the mission critical Microsoft applications fueling corporations worldwide – the Teneros Application Continuity Appliance™. Funded by New Enterprise Associates (NEA), Sevin Rosen Funds, and STAR Ventures, the company is developing a family of plug-&-go™, business continuity appliances to serve the needs of mid-market companies and branch offices of large enterprises. Teneros is an Advanced Infrastructure Solutions Microsoft Gold Partner. Teneros is headquartered at 215 Castro St., 3 rd Floor, Mountain View, Calif., 94041.
